

AMAZING! EVERYTHING IN ONE PLACE...

MPVEX BOOMEA

Re-imagining how you communicate & collaborate with your staff, customers, and the rest of the world.

CHAT

Chat and File Share with your team in the most unique way yet. Work with your team or anyone in the Company Directory. Announce your Presence in real time and set up private group messages. The flexibility is amazing.

WEB MEETINGS

A web meeting was always cumbersome to setup and very expensive. Not anymore. Click on Meetings, Click Start or Join Meeting, share the meeting link, and away you go.

CONTACTS

Most collaborations start with a contact. We've made your contacts into something other than a name and number. Now you can see all of your communication history at each contact. Oh, and setup your calls from your contact too.

PHONE INTEGRATION

Imagine sitting in front of your PC. Your MPVEX Boomea app DINGS and you see a new message from someone on your team. You can respond in chat or click a Quick-Call button and start talking on the phone with them. You can view your real-time call history, view real-time phone presence (BLF), access voicemails, access call recordings, heck you can even supervise agents with the Call Center Console built right into MPVEX Boomea.

PLATFORMS

Boomea works inside any Internet Browser and we have downloadable apps for Windows and MacOS PCs. For the mobile workers Boomea also is downloadable for iPhone OS and Android smartphones & tablets.
